

Making F&B Spaces Accessible, Efficient & Customer-Ready

Audit

Report

Supply

Implement

Document

One partner for customer accessibility, back-of-house movement and franchise-level standardisation.

Acc-Red builds accessibility infrastructure for F&B spaces.

We support brands with audits, product supply, implementation and accessibility documentation across India.

Audit

1

Measure barriers, level differences and movement paths.

Recommend

2

Outlet-wise reports with product-fit and BOQ direction.

Supply

3

Ramps, lifts, signage, tactile pathways and related products.

Implement

4

Site coordination, installation support and handover.

Document

5

Completion documentation

Built for chains that need consistency across outlets, not one-off fixes.

F&B chains need accessibility that works for customers, staff and operations.

Every outlet has movement points: entrances, thresholds, seating, counters, washrooms, loading areas and back-of-house routes.

Customer access

Wheelchair users, elderly customers, parents with strollers and temporarily injured customers need safe, dignified access.

Brand consistency

Franchise and multi-city chains need standard solutions across every outlet format.

Operational flow

Raw materials, crates, kitchen equipment and tall baking trays often move through the same level differences.

Compliance readiness

RPwD Act, 2016 alignment supports trust, but the stronger story is customer experience plus operational ease.

The goal: let people, products and teams move without friction.

SCOPE OF IMPACT

We make the complete F&B environment movement-ready.

Consumer-facing outlets

Entrance, threshold, seating access, service counters, washrooms and movement paths.

Kitchen and backend movement

Supplies, trays, racks, cartons, crates, equipment and loading points.

Corporate offices

Reception, meeting rooms, employee routes, washrooms, signage and visitor access.

Franchise standardisation

Repeatable branch-wise templates for multi-city outlet networks.

One ramp, two use cases.

A single ramp can improve customer access and simplify daily movement of supplies into outlets.

Customer accessibility

Wheelchair users, elderly guests, families and customers with temporary injuries get safer, dignified entry.

Operational movement

Raw materials, cartons, tall baking trays, racks, equipment and delivery loads move with less strain.

Reduces manual lifting, staff injury risk, product spillage, loading delays and dependency on extra manpower.

A complete accessibility toolkit for F&B and hospitality environments.

Portable ramps

Fast deployment for steps and temporary access gaps.

Roll-A-Ramp

Flexible ramping for multi-use and operational movement.

Tactile pathways

Guided movement for visually impaired users.

Threshold ramps

Smooth movement across small level differences.

Platform lifts

Vertical access where ramping is not practical.

Accessibility audit

Branch-wise assessment

Modular ramps

Structured access for larger level changes.

Braille signage

Inclusive wayfinding for customers and offices.

Handover documentation

Completion documentation after implementation.

Flexible packages. Same professional standard.

Clients can choose a specific scope or move directly into a pan-India accessibility rollout. Pricing is customised after audit.

01 Audit + Report Only

Professional branch-wise accessibility assessment and recommendation report.

02 Product Supply Only

Ramps, lifts, signage or tactile products for internal execution teams.

03 Turnkey Implementation

Audit, report, product supply, installation support, documentation.

04 Pan-India Rollout Program

Centralised planning with branch-wise execution across cities and outlet formats.

Audit to report to implementation in just 7 days.

A fast standard-outlet cycle helps F&B chains move from intent to action without long operational disruption.

Note: Timeline applies to standard outlet scopes. Complex civil changes or platform lift installations may vary after site assessment.

WHY ACC-RED

Built for F&B chains that need reliable execution across India.

We combine accessibility knowledge, product availability and branch-level implementation discipline into one accountable partner.

Pan-India presence

Support for multi-city branch networks and outlet clusters.

Audit + implementation

One team from assessment to execution.

Operational practicality

Solutions for customers, staff and material movement.

Minimal disruption

Practical upgrades around live outlet realities.

Custom quote after audit

No forced standard quote before site constraints are understood.

Compliance-aware

RPwD Act, 2016 alignment without making it a legal lecture.

Accessibility becomes easier when it also improves daily movement and outlet operations.

Trusted by F&B, hospitality and institutional environments.
