

Proven accessibility solutions for branch networks across India

Acc-Red supports banks with practical, site ready accessibility infrastructure that helps improve branch access for wheelchair users, senior citizens, and customers with mobility needs.

1,000+

Accessibility installations

150+

Cities served

2021

Founded in Mumbai

Pan-India

Execution capability

Selected banking relationships

Built for decision makers in **Facilities, Admin, Procurement, Branch Projects, and Leadership**

Live banking installations

Institutional fit

Bank of Baroda branch ramp

ICICI Bank branch installation

Why banks work with Acc-Red

Designed for institutional buyers who need reliability, not vendor theatre.

Pan-India execution mindset

Experience supporting banking requirements across multiple locations with solutions that adapt to real-world branch constraints.

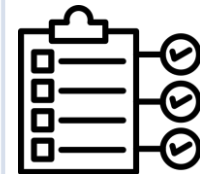

Product fit for branch environments

Fixed ramps, portable ramps, and stair lifts selected around site conditions, safety, and operational practicality.

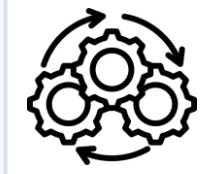

Direct work with major institutions

Acc-Red has supported leading names such as RBI, ICICI Bank, Bank of Baroda, IndusInd Bank, and IDFC FIRST Bank.

Execution over theory

The focus is not generic accessibility talk. The focus is infrastructure that can actually be deployed, used, and maintained.

Serious operational maturity

1,000+ installations and work across 150+ cities and 25+ states/UTs signal repeatability, process discipline, and on ground implementation capability.

Suitable for mixed stakeholders

Relevant to Facilities, Admin, Procurement, Branch Projects, and Leadership teams evaluating branch access upgrades.

The value proposition for banks is straightforward: a credible partner that understands accessibility as a practical branch infrastructure requirement, not just a compliance talking point.

Selected banking experience

Illustrative references based on work completed and ongoing engagements shared for this deck.

Institution	Solutions	Approx. scope	Geography	Delivery model	Execution status / context
RBI	Fixed ramp	Main office	Mumbai	Installation	Completed installation for the main office environment.
Bank of Baroda	Fixed ramps, portable ramps, stair lifts	150+ locations	Pan India	Direct	Completed installations across a large distributed branch footprint.
ICICI Bank	Fixed ramps, portable ramps, stair lifts	100+ locations and ongoing	Pan India	Direct	Completed installations with ongoing engagement.
IDFC FIRST Bank	Portable ramps	10+ locations and ongoing	Pan India	Direct	Supply support for ongoing accessibility requirements.

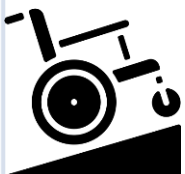

What this signals to a bank buyer: Acc-Red is not approaching the sector as a first experiment. The company has already operated in live banking contexts across different geographies and deployment formats.

What Acc-Red can deliver for banks

A practical toolkit for improving accessibility across branch and customer-facing infrastructure.

**Fixed ramps**

Suitable for permanent access improvement where branch entry conditions allow a stable installed solution.

**Portable ramps**

Useful where flexibility, quick deployment, or non-invasive solutions are preferred across branch networks.

**Stair lifts**

Relevant in sites where vertical movement support is required beyond ground-level access.

**Site sensitive recommendations**

Not every branch needs the same solution. The right fit depends on entry levels, circulation, and user flow.

**Rollout readiness**

Support for one off branches, pilot deployments, or broader multi-location implementation conversations.

**Institutional communication**

Documentation and project framing suitable for internal review by operational and leadership stakeholders.
