

# ABOUT US

*At Acc-Red, we are committed to making healthcare, education, and employment accessible to all through innovative mobility solutions. As pioneers in accessibility in India, we also consult on inclusive design by providing wheelchair ramps, Braille signages, and tactile floor plans to create truly inclusive spaces.*

# OUR PRODUCTS

# SUITCASE RAMPS

*Lightweight, foldable design*

## KEY FEATURES:

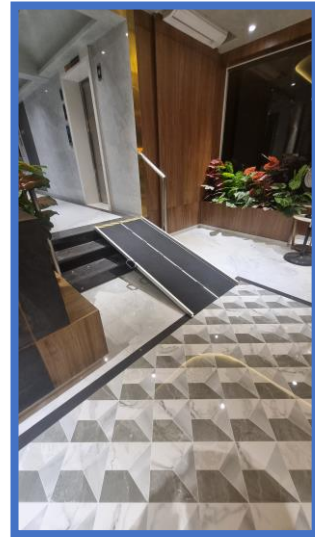

*Can be used for electric & manual wheelchairs.*

*Easy to carry using the handle.*

*Secure locking mechanism which prevents unwanted opening.*

*Highly durable with a weight capacity of 300kg.*

*Anti – skid surface to ensure uniform grip at all given times.*

# TELESCOPIC RAMPS

*Adjustable length for flexible use*

## KEY FEATURES:

*Can be used while open as well as closed.*

*Easy to carry using the handle.*

*Secure locking mechanism which prevents unwanted opening.*

*Highly durable with a weight capacity of 300kg.*

*Anti – skid surface to ensure uniform grip at all given times.*

*Ideal for carrying during traveling.*

# SOCIETY RAMP

*Seamless accessibility in residential and commercial spaces*

## KEY FEATURES:

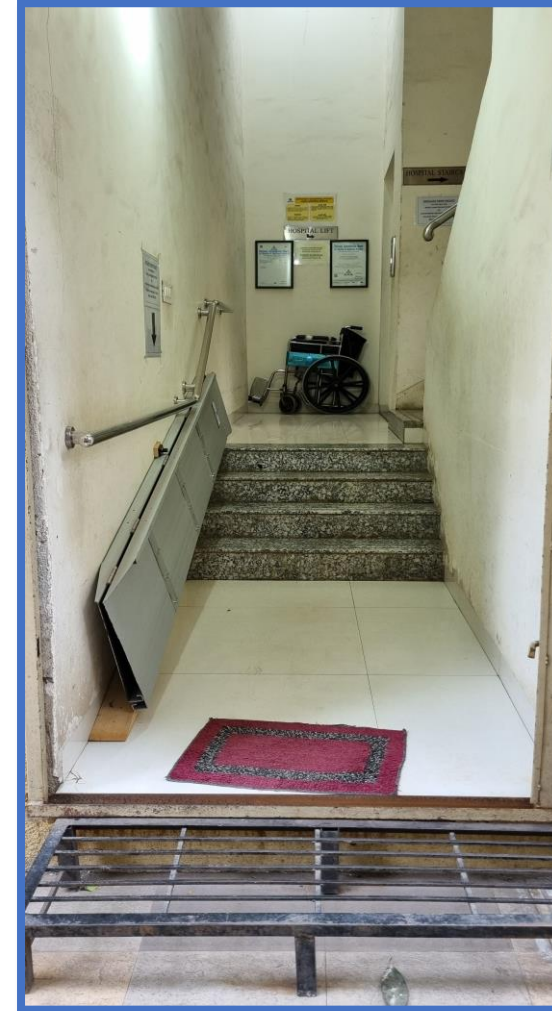

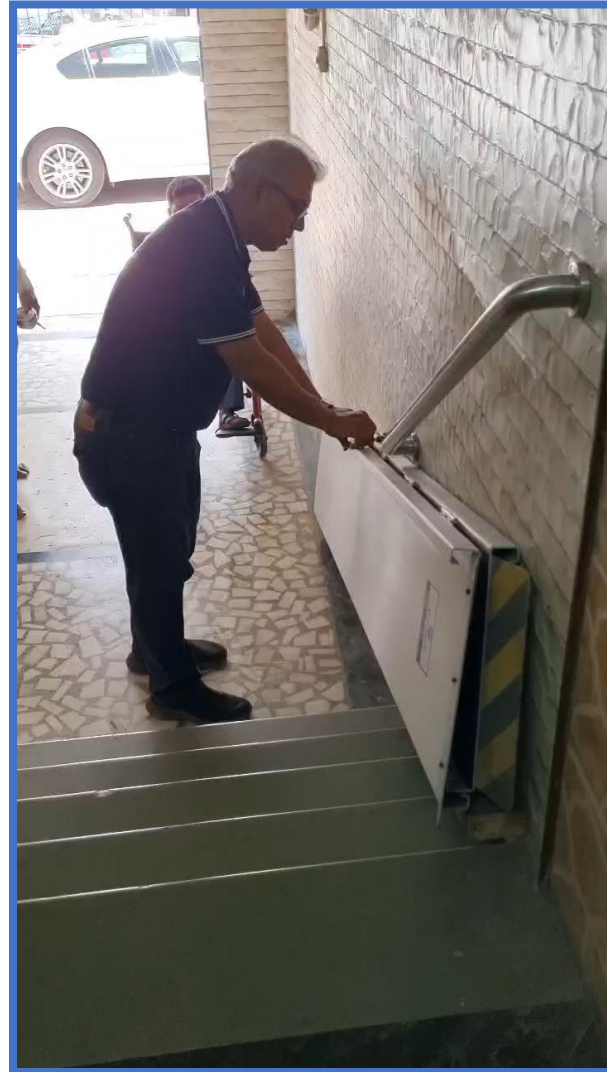

*Hassle - free installation.*

*Ideal for steep staircases & narrow entrances.*

*Space – saving design with a secure locking mechanism.*

*Highly durable with a weight capacity of 300kg.*

*Anti - skid surface to ensure uniform grip at all given times.*

# MODULAR RAMPS

*Adjustable length for flexible use*

## KEY FEATURES:

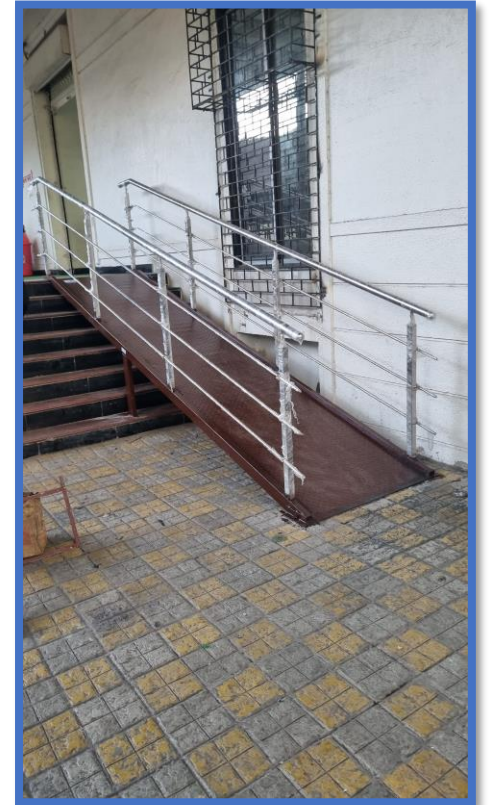

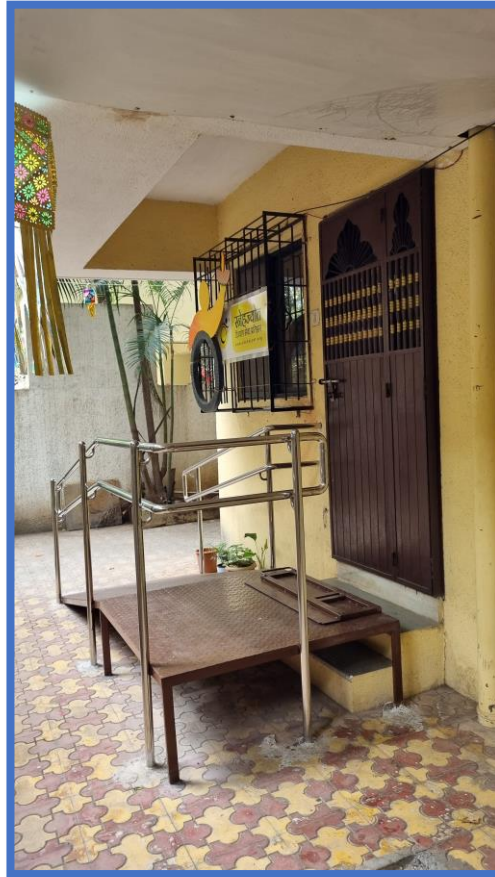

*Customized as per requirements.*

*Intelligent, space – optimizing design.*

*Handrails for added support while ascending and descending.*

*Weather resistant & Highly durable with a weight capacity of 500kg.*

*Chequered plate surface to ensure uniform grip at all given times.*

# THRESHOLD RAMP

*Customized Solutions for indoor mobility*

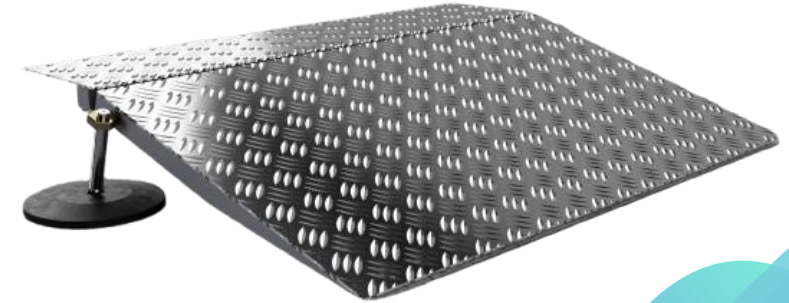

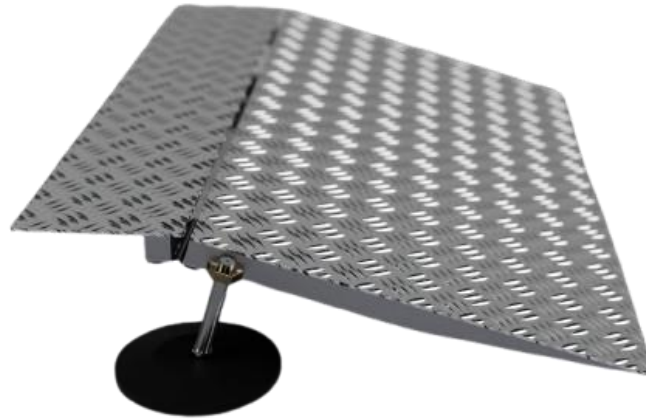

## KEY FEATURES:

*Customized as per requirements.*

*Intelligent, space – optimizing design.*

*Water resistant & Highly durable with a weight capacity of 300kg.*

*Chequered plate surface to ensure uniform grip at all given times.*

# ROLL-A-RAMP

*Instant accessibility for wheelchairs  
and mobility scooters*

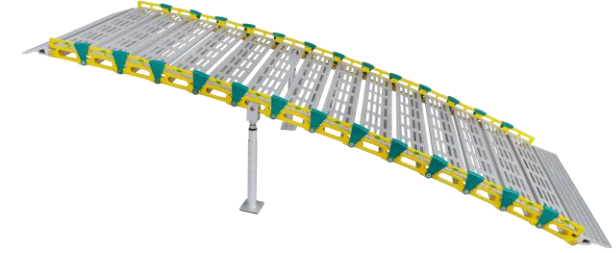

## KEY FEATURES:

*Customized as per requirements.*

*Rolling form factor.*

*Water resistant & Highly durable with  
a weight capacity of 300kg.*

*Handrails available as add - on.*

# WHEELCHAIR LIFT

*Compact, non-invasive lifting  
system for elevated access*

## KEY FEATURES:

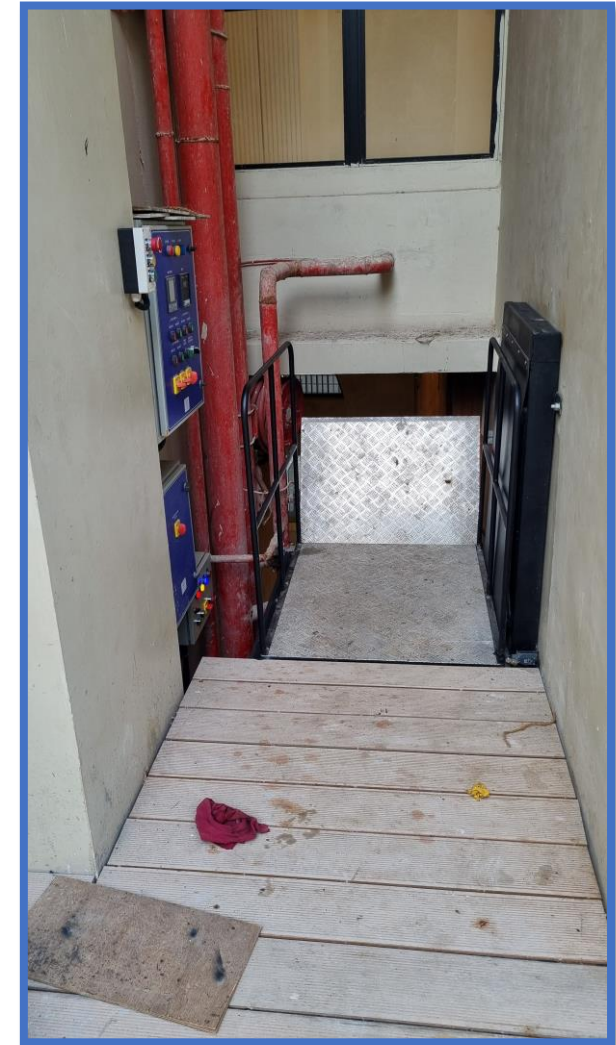

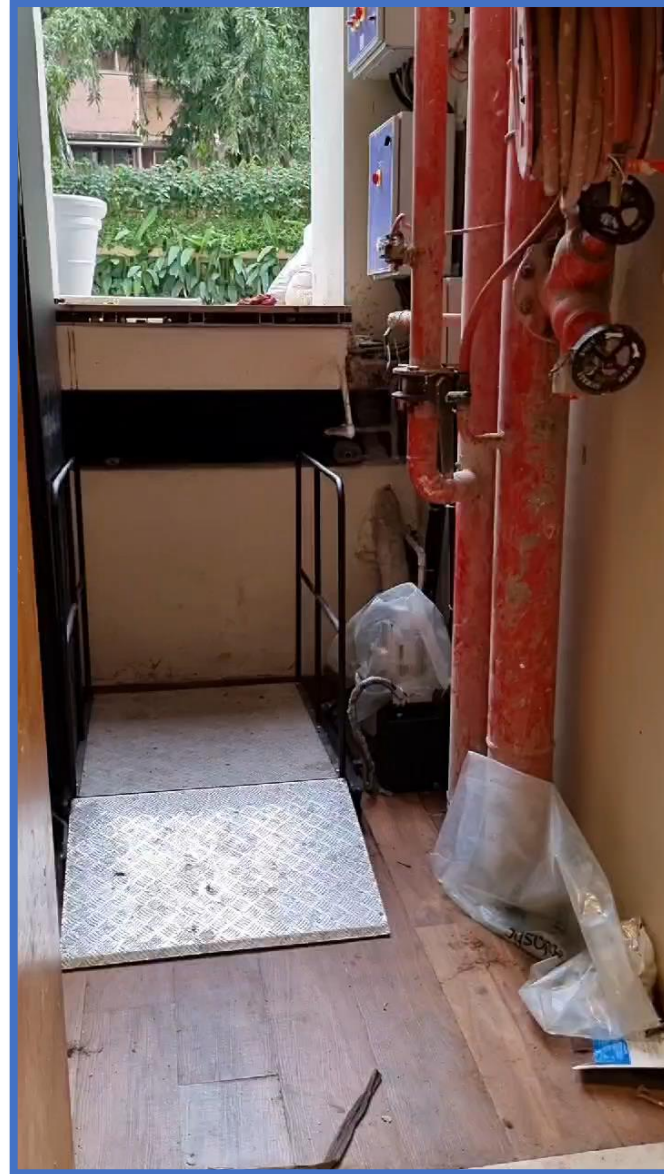

*Customized as per requirements.*

*Intelligent, space – optimizing design.*

*Energy saving hydraulic operation.*

*Low maintenance.*

*Easy to operate.*

# CHAIR STAIRLIFT

*Non-invasive lifting system for  
staircases*

## KEY FEATURES:

*Available in straight and curved models.*

*Available in indoor and outdoor variants.*

*Energy saving battery operation.*

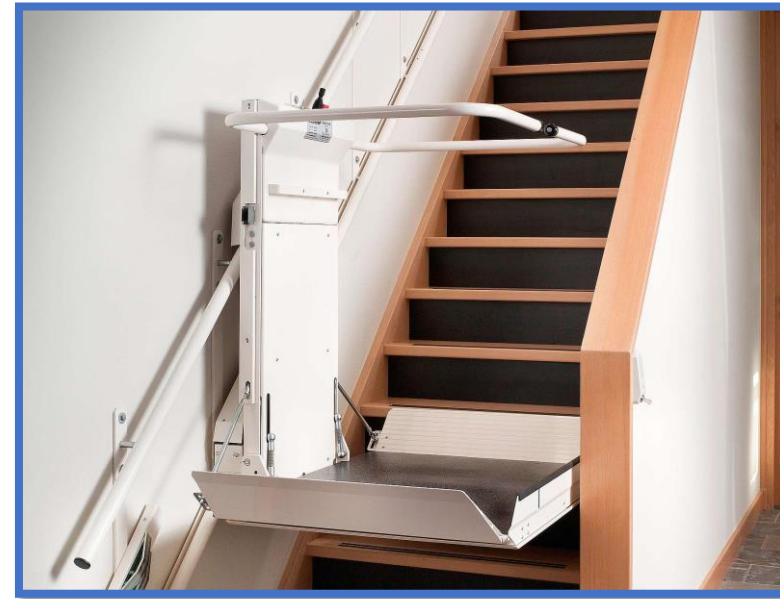

*Low maintenance.*

*Easy to operate.*

# PLATFORM STAIRLIFT

*Non-invasive lifting system for staircases*

## KEY FEATURES:

*Available in straight and curved models.*

*Available in indoor and outdoor variants.*

*Energy saving battery operation.*

*Low maintenance.*

*Easy to operate.*

# WHEELCHAIR TAIL LIFT

*Vehicle-mounted lift for effortless  
wheelchair boarding*

## KEY FEATURES:

*Easy to install.*

*Powered using the battery of the vehicle.*

*Equipped with stabilizers for uniform speed.*

*Low maintenance.*

*Easy to operate.*

# WHEELCHAIR RESTRAINTS

*Vehicle-mounted device designed to keep wheelchairs safely in place during transport*

## KEY FEATURES:

*Easy to install.*

*Built with durable materials for long-lasting performance.*

*Meets international safety standards for wheelchair transportation.*

*Suitable for vans, ambulances, personal vehicles and accessible taxis.*

*Easy to operate.*

# CAR TRANSFER SEAT

*A hybrid innovation for effortless vehicle entry/exit with minimal car modifications. Ideal for all users*

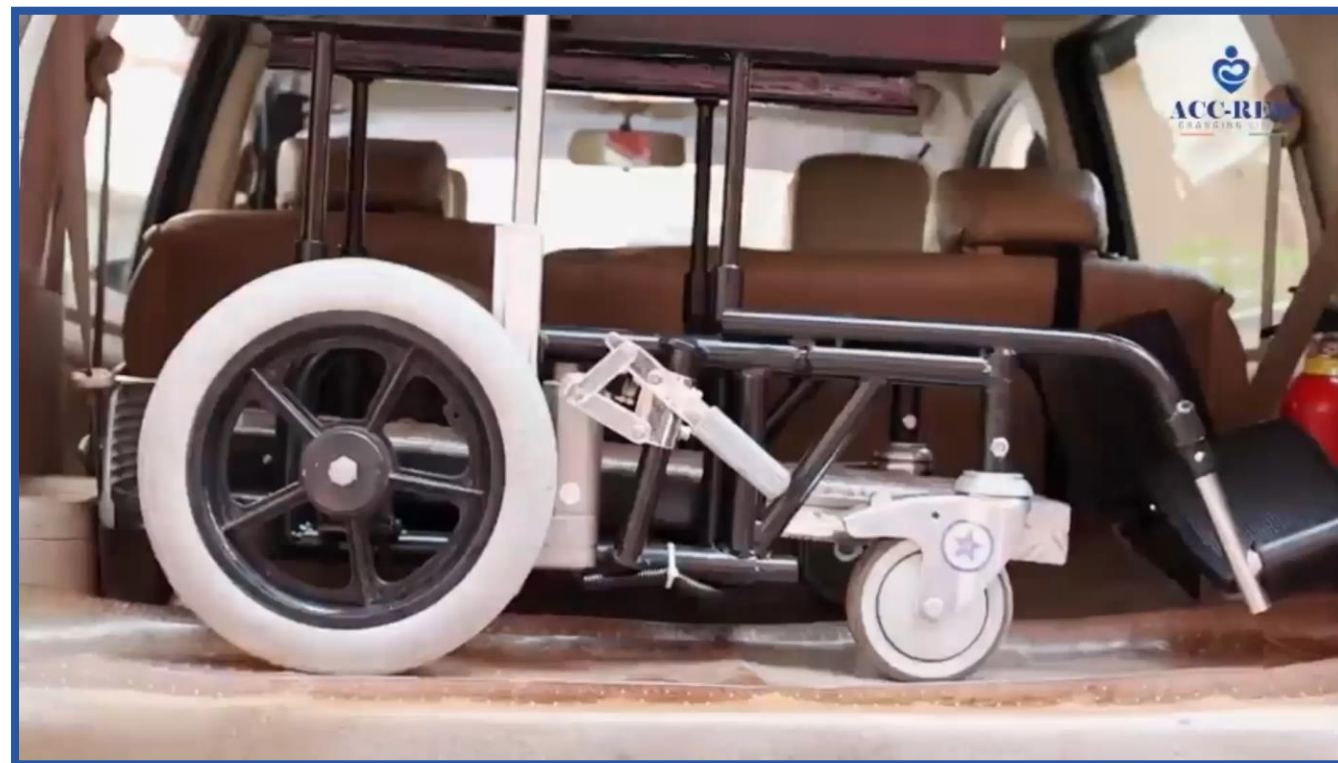

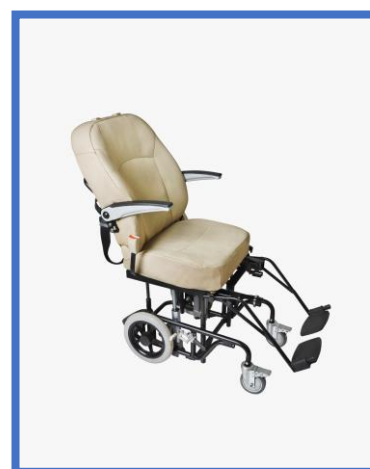

## KEY FEATURES:

*Compatible with most car models.*

*Smooth 90° swivel mechanism.*

*Ergonomic, space-saving design.*

*No modifications required.*

# SWIVELLO

*effortless vehicle entry/exit with  
minimal car modifications. Ideal for  
all users*

## KEY FEATURES:

---

*Compatible with most car models.*

---

*Smooth 90° swivel mechanism.*

---

*Ergonomic, space-saving design.*

---

*No modifications required.*

# STEP GLIDE

*A motorized electric chair which can be used to bring individuals up and down the stairs.*

## KEY FEATURES:

---

*Can climb 500 steps in a single charge.*

---

*Can be folded into a compact chair.*

---

*Easy to use.*

---

*Can be used even on steep staircases.*

# EVAC CHAIR

*A device which is used to bring individuals down the stairs in case of emergencies.*

## KEY FEATURES:

---

*Lightweight and foldable.*

---

*Quick deployment.*

---

*Easy to use.*

---

*Can be used even on steep staircases.*

# BRAILLE SIGNAGES

*Signages equipped with braille for individuals with visual impairments*

## KEY FEATURES:

*Customized as per requirement.*

*ADA and RPWD compliant installation.*

*Available in CVD friendly color combinations.*

# BRAILLE FLOOR PLANS

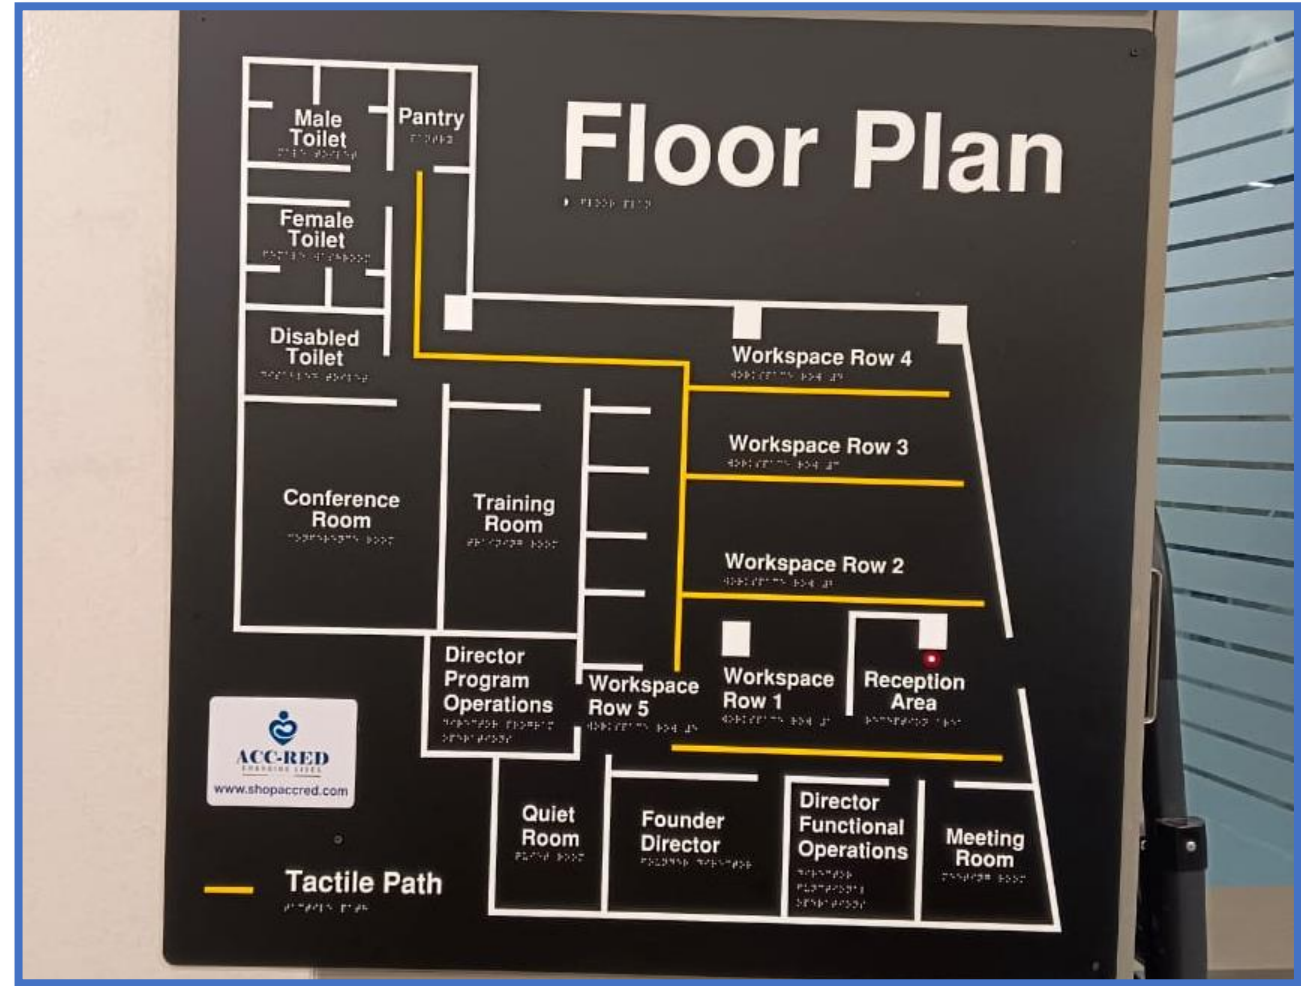

*Floor Plans equipped with braille  
for individuals with visual  
impairments*

## KEY FEATURES:

*Customized as per requirement.*

*ADA and RPWD compliant installation.*

*Available in CVD friendly color  
combinations.*

# TACTILE PATHWAYS

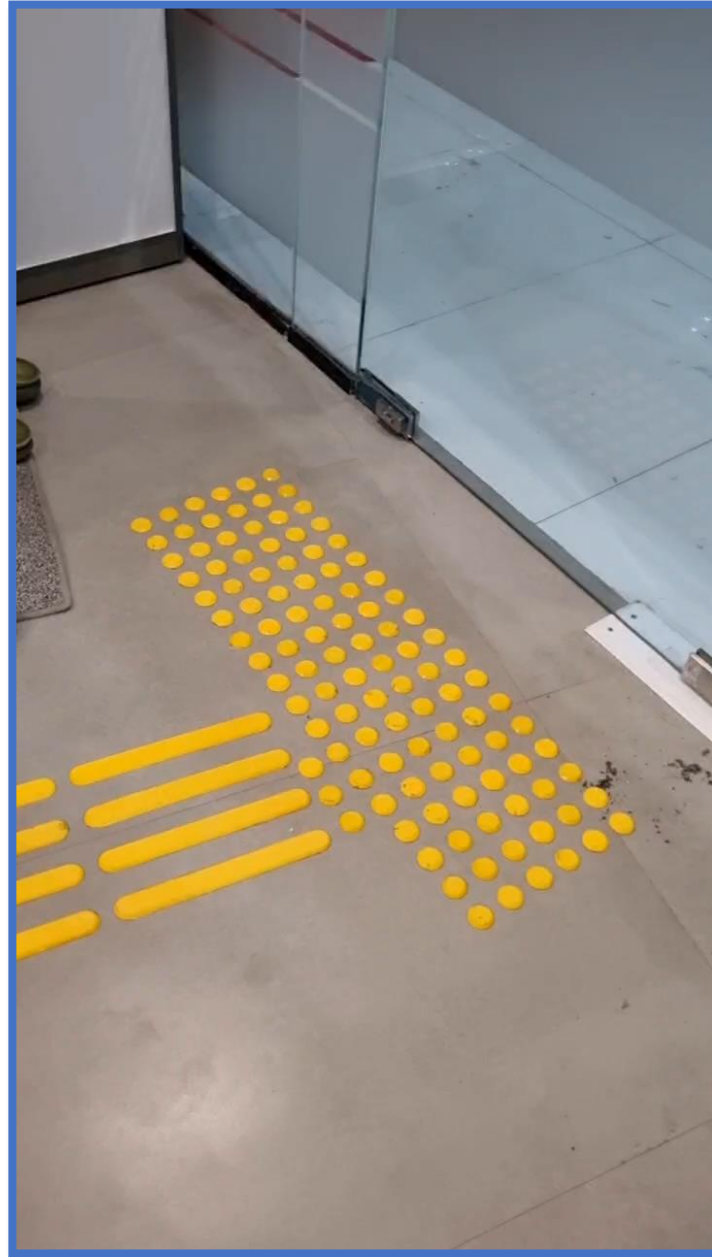

*Tactile Pathways for visually impaired individuals.*

## KEY FEATURES:

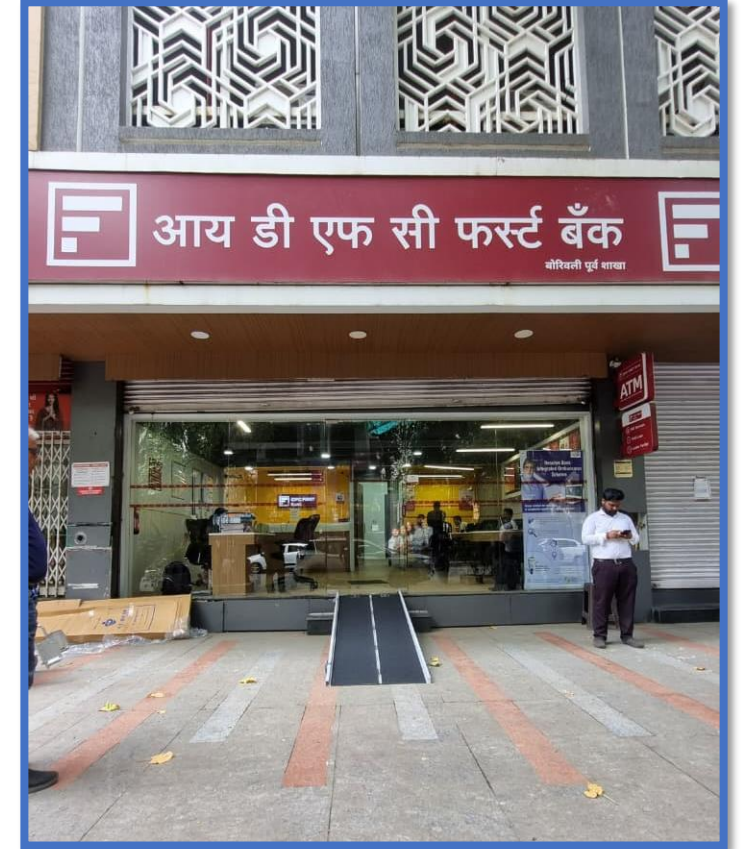

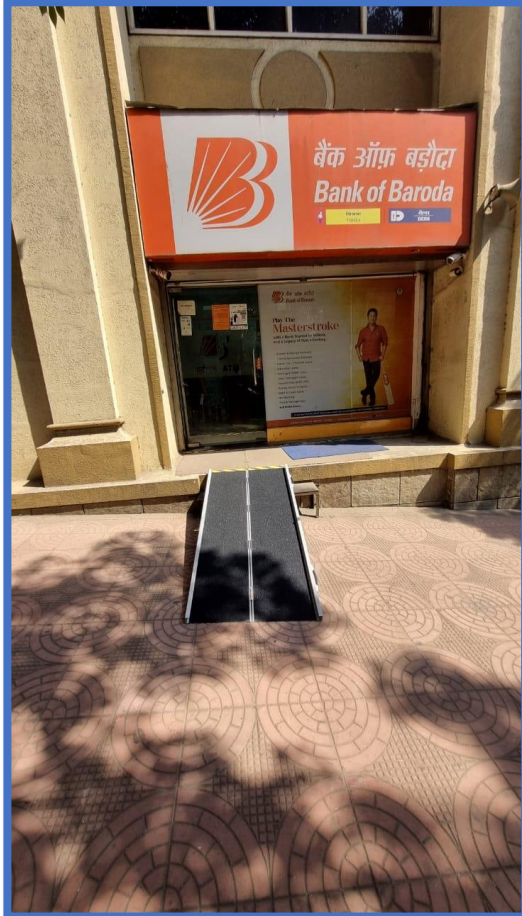

*Available in adhesive as well as engraved variants.*

*ADA and RPWD compliant installation.*

*Available in both tile format and individual format.*

Industries Limited

# WHY US?

Not only do we have a team of dedicated professionals who understand your needs, but we also have:

## INNOVATION DRIVEN PRODUCTS

Because problems are not limited, neither are our products! We are your one – stop solution for all wheelchair mobility & accessibility solutions.

## 24/7 CUSTOMER SUPPORT

Our trained professionals are ready to assist you – no matter what time of the day it is.

By choosing us, you not only choose an accessibility partner; You embark on our journey alongside us – *Changing lives every day.*

## Can & able! Champions on wheels triumph at TMM

Swati Deshpande & Rebecca Samervel | TMM

**Mumbai:** The shortest run of 1.3 km ended with the loudest cheers. The participants deserved it, said those cheering them on at the finish line. They were the champions of disability. The segment at the TMM 2025 moved other runners. The participants themselves, who at times hurtled down the tar road route in their wheelchairs or had to manoeuvre carefully over the sometimes unfriendly, uneven tarmac, smiled later with

abandon. The marathon, they said, afforded them this joy. The category saw a total of 1,089 participants.

Rajeshwari Mane, a law student and an accountant from Vikhroli, was with friends Rohini Sathe and Vinod Rawat, both in wheelchairs. Rohini's husband, Vinod, who had a leg amputated below one knee, works at KEM Hospital, where he said they work on making equipment available to those in need. He is also a fencing player and recently completed the base camp at the Himalayas as the

first above-knee amputee, and his dream next is to scale Everest. "It is not about name and fame, but to chase a dream that's on the bucket list," he said. As he spoke to TOI, others wheeled in speedily, excited to have completed the 'run', carrying various sports articles, including a cricket bat and a basketball, as part of the Wheelchair Sports Association's plea to support the Paralympics.

Among them was Manoj Sharma, who works as a delivery person with a scooter with an attached sidcar.

Ahilya Nagar Kajal Salve, 30, who suffered a spinal cord injury in a car accident two years ago, was with by her mother, Sunita Salve, who was her buddy. Wheelchair-bound Kajal, who had to give up her career after the accident, was happy to participate in her first marathon. "The atmosphere was electrifying with people cheering for us. My mother pushed my wheelchair during the entire stretch. My aim in life is to be independent in every possible way, even if I am on this wheelchair," Kajal said, smiling as a senior citizen runner congratulated her.

**CHASING DREAMS:** The special category saw 1,089 participants

## From wheelchairs to free modified car rides and carpools: How Maharashtra is making elections accessible to all

RUPSA CHAKRABORTY  
MUMBAI, NOVEMBER 16

**AHEAD OF** the Assembly elections, persons with disabilities (PwDs) are rallying to ensure inclusive voting. Across Maharashtra, individuals and organisations are offering wheelchair-accessible vehicles and free transport services for PwDs. Entrepreneurs specialising in disability-friendly equipment are also providing their vehicles at no cost. Meanwhile, parents' groups are organising carpools to assist young voters with special needs to uphold the constitutional right to vote for all.

To foster inclusivity, the State Election Commission has introduced several measures, including deploying low-floor BEST

(L-R) Prakash Andhare and Rajesh Patil

buses on regular routes for the first time to assist PwDs who did not opt for home voting.

Prakash Andhare, a former scientist from Nagpur who has been wheelchair-bound for 30 years, has volunteered his modified disability-friendly vehicle to help others. As one of the few individuals in Nagpur with such advanced

transportation options, he has become an indispensable resource. "Elections shape our country, and they should be accessible to everyone. During this year's Lok Sabha election, I helped seven PwDs reach polling centres, and this time, I've already received requests from four individuals," he shared. "Staircase-climbing wheel-

chairs were also provided during the last two elections to assist disabled voters living on upper floors without lifts," Andhare said. "However, each vehicle can transport only one wheelchair-bound voter at a time, meaning no more than 10 individuals can be accommodated during the 10-hour voting period. Advance planning is crucial to help as many people as possible," he added.

In Dhule, a parent group supporting individuals with special needs—including the blind, hearing impaired, and those with non-wheelchair mobility challenges—has arranged for two buses to transport voters. Rajni Kamath, a mother of a 28-year-old autistic son, is spearheading the effort. "Even though my child is autistic, he has every right to vote, which many people fail to understand.

Despite his limited verbal communication, he knows who to vote for based on his intellectual capacity," Kamath said.

For the first time in general elections this year, home voting was extended nationwide to senior citizens aged 85 and above and PwDs with a 40 percent or greater disability. Despite this provision, many eligible voters still need to visit polling centres.

In Mumbai, entrepreneur Rajesh Patil, who specialises in disability-accessible ramps and wheelchairs, is offering additional modified vehicles to ferry voters. "These vehicles will transport PwDs to polling centres, wait for them to cast their votes, and then bring them back home. The service is entirely free," he said.
